Concussion Protocol

Many students within Alturas Preparatory Academy Charter School participate in extracurricular activities of a nature whereby physical injury may result. Though the Charter School takes care to ensure all extracurricular activities are as safe as practicable, it is not possible to remove all danger from such activities, and the Charter School acknowledges that concussions may result. The purpose of this policy is to address situations in which student concussions have occurred or are suspected to have occurred.

This policy only applies to organized athletic league or sport in which any Charter School student participates as an athlete or youth athlete. For the purposes of this policy, athlete or youth athlete means an individual who is eighteen (18) years of age or younger and who is a participant in any middle school, junior high school, or high school athletic league or sport. A school athletic league or sport shall not include participation in a physical education class.

Pre-Season Education

The administration and coaches will work to ensure that athletes, youth athletes, parents, volunteers, and assistant coaches are educated about concussions. Prior to being allowed to engage or participate in any Charter School athletic league or sport:

1. Each student desiring to participate in such Charter School athletic league or sport, and the student's parents/guardians, shall be provided notice of and/or copies of any concussion guidelines or information available from the State Department of Education and the Idaho High School Activities Association, as well as this policy.
2. Each student desiring to participate in such Charter School athletic league or sport, and the student's parents or guardians, shall acknowledge that they have been provided the guidelines or information available from the State Department of Education and the Idaho High School Activities Association as well as this this policy, have had the opportunity to review, and have reviewed such information. Further, each student and the student's parents/guardians shall sign an applicable waiver for participating in such Charter School athletic league or sport.
3. The signed waiver and acknowledgment of review of the appropriate information shall be returned to the Charter School.
4. Coaches, referees, game officials, game judges and athletic trainers shall be provided with a copy of notice any concussion guidelines or information available from the State

Department of Education and the Idaho High School Activities Association, and also this policy. All coaches, referees, game officials, game judges, and athletic trainers shall review such information upon employment and biannually thereafter. This information will also be made available to the general public through the Charter School website.

Protocol on Suspected Concussion

If, during any Charter School athletic league or sport practice, game, or competition, an athlete exhibits signs or symptoms of a concussion; makes any complaint indicative of a possible concussion; or a coach, assistant coach, volunteer coach, or other Charter School employee has reason to believe a concussion has occurred; such student shall be removed from play or participation in the practice, game, or competition. According to the Centers for Disease Control and Prevention, and for the purposes of this policy, signs observed by coaching staff which could be indicative of a concussion include if the athlete:

1. Appears dazed or stunned;
2. Is confused about assignment or position;
3. Forgets an instruction;
4. Is unsure of the game, score, or opponent;
5. Moves clumsily;
6. Answers questions slowly;
7. Loses consciousness, even briefly;
8. Shows mood, behavior, or personality changes;
9. Can't recall events prior to hit or fall; or
10. Can't recall events after hit or fall.

According to the Centers for Disease Control and Prevention, and for the purposes of this policy, symptoms reported by the athlete which could be indicative of a concussion include:

1. Headache or "pressure" in head;
2. Nausea or vomiting;
3. Balance problems or dizziness;
4. Double or blurry vision;
5. Sensitivity to light;
6. Sensitivity to noise;
7. Feeling sluggish, hazy, foggy, or groggy;
8. Concentration or memory problems;
9. Confusion;
10. Does not "feel right" or is "feeling down".

Coaches should not try to judge the severity of the injury themselves. Health care professionals have a number of methods that they can use to assess the severity of concussions. Coaches should record the following information, if possible, to help health care professionals in assessing the athlete after the injury:

1. Cause of the injury and force of the hit or blow to the head or body;
2. Any loss of consciousness (passed out or knocked out) and if so, for how long;
3. Any memory loss immediately following the injury;
4. Any seizures immediately following the injury; and
5. Number of previous concussions, if any.

Athletes may not be returned to play or participate in any student athletic league or sport, except on an administrative basis such as team manager, until and unless the athlete has been evaluated and is authorized to return to play or participate by a qualified health care professional who is trained in the evaluation and management of concussions, including a physician or physician's assistant licensed under chapter 18, title 54, Idaho Code, an advanced practice nurse licensed under Idaho Code 54-1409, or a licensed health care professional trained in the evaluation and management of concussions who is supervised by a directing physician who is licensed under chapter 18, title 54, Idaho Code. Such authorization must be in writing and must be provided to the Charter School prior to the student being returned to play. If the authorization is signed by a licensed health care professional trained in the evaluation and management of concussions, such authorization must also be countersigned by the directing physician.
